□ **Instructions:**

- Students of respective branches will undergo for Scheme A (For Civil & Mech), Scheme B (for AIDS & CSE) and Scheme C (for Electrical & E&TC)

➤ **Guidelines for the Student Induction Program:**

- New entrants in an engineering program come with different backgrounds, perspectives, and experiences- social, economic, regional, and cultural. It is essential to help them transition smoothly into this new environment and instill in them the institution's ethics, along with a broader sense of purpose.
- To facilitate this transition, an **Induction Program** for newly admitted undergraduate students will be conducted at the beginning of the first semester.
- The Induction Program aims to:
 - Help students acclimate to their new surroundings.
 - Foster openness and interpersonal connections.
 - Establish a healthy daily routine.
 - Build peer-to-peer and faculty-student relationships.
 - Enhance self-awareness and sensitivity toward others, society, and nature.
- The program includes the following activities that promote personal growth, social awareness, and academic readiness and to help them integrate into their new environment
 - Physical activities for well-being.
 - Creative arts for expression.
 - Literary activities for intellectual development.
 - Universal human values to encourage ethical awareness and social responsibility
 - Proficiency modules to strengthen foundational academic skills.
 - Lectures by experts and eminent persons for valuable insights.
 - Visits to local establishments such as hospitals and social NGOs to connect with the community.
 - Familiarization with the institute and various departments
- While the Induction Program does not carry any marks or credits, student participation will be assessed at the institute level based on the following mandatory criteria:

Chairman
Board of Studies (BoS)
Basic Sciences and Humanities
FTCCOER, Sangola
(An Autonomous Institute)

Chairman
Board of Studies (BoS)
Mechanical Engineering
FTCCOER, Sangola
(An Autonomous Institute)

Vice Principal
Fabtech Technical Campus
College of Engg. & Research, Sangola

Principal
3 FABTECH TECHNICAL CAMPUS
COLLEGE OF ENGINEERING
& RESEARCH, SANGOLA

➤ **Course Nomenclature Format:**

Courses are assigned unique 10-character codes following the structure below:

- **First two numeric characters** – Indicate the academic inception year of curriculum implementation, e.g., 25 for 2025.
- **Next one character** – Represent the education level, e.g., U- for Undergraduate and P- for Postgraduate
- **Following two characters** – Discipline code, e.g., GS- for General Science Engineering, AI- Artificial Intelligence and Data Science, CE- Civil Engineering, CS- Computer Science and Engineering, EE- Electrical Engineering, ET- Electronics and Telecommunications Engineering, ME- Mechanical Engineering.
- **One numeric character** – Years of study within a degree or program, e.g., 1 for F.Y. B. Tech, 2 for S.Y. B. Tech. 3 for T.Y. B. Tech and 4 for Final Year
- **One numeric character** – Semester numbers range from 1 to 2.
- **Next three numeric characters** – Department-assigned course number, e.g., 001 to 99,9 under different course categories

➤ **Course Type Descriptions:**

Type of Course	Description	Course Code	Responsible Department
BSC	Basic Science Course	001-100	General Science Department (FE)
VSEC	Vocational and Skill Enhancement Course	101-200	
IKS	Indian Knowledge System	201-300	
CC	Co-curricular Courses	301-400	
AEC	Ability Enhancement Course	401-500	
Respective Departments			
ESC	Engineering Science Course	001-100	Respective Departments
PCC	Program Core Course	101-200	
PCE	Program Core Elective	201-300	
HON	Honors	301-400	
MDM	Multidisciplinary Minor	401-500	
OE	Open Electives	501-600

First Year B. Tech.

Semester-I (w.e.f. A.Y. 2025-26)

Applied Physics (25UGS11001)

Teaching Scheme:			Evaluation Scheme:	
	No. of Hrs./week	No. of Credits		
Lectures:	3	3	MSE:	30 Marks
Tutorials:	-	-	ICA:	10 Marks
Practical:	-	-	ESE:	60 Marks
Total:	3	3	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to

CO 1	Apply the concept of acoustics and calculate absorption coefficients and reverberation time.	
CO 2	Describe the production of ultrasonic waves and identify various types of defects in materials.	
CO 3	Use interference, diffraction, and polarisation phenomena to design optical instruments.	
CO 4	Describe the concepts of nuclear physics and Quantum Mechanics.	
CO 5	Explain nanomaterials, their production techniques, and synthesis method.	

Unit	Course Contents	No. of lectures (hrs.)
Unit 1	Acoustics Acoustics: Introduction, Architectural acoustics, Reverberation time, Sabine's formula, Absorption coefficient, Factors affecting on architectural acoustics of buildings, Acoustic planning of buildings (remedies) and numericals.	8
Unit 2	Ultrasonics Ultrasonics: Ultrasonic waves, Production of ultrasonics (Piezoelectric effect, Magnetostriction effect), and its applications and numericals. Non-Destructive Testing (NDT): Types of defects, Method of NDT, Visual Inspection, Liquid/Dye penetrant testing.	8
Unit 3	Wave Optics Interference: Interference in thin film due to reflected light, Wedge-shaped film, Newton's Rings, Polarization of light: Methods for production of polarized light	8

	(Reflection, Refraction & Double refraction), Specific rotation and optical activity, Diffraction of light: Definition and difference between diffraction and interference. Introduction of diffraction grating, Resolving power of diffraction grating.	
Unit 4	Nuclear Physics & Quantum Mechanics Nuclear Physics: Mass Defect, Nuclear reaction, Q values of nuclear reaction, GM Counter, Quantum Mechanics: de Broglie's Concept of matter wave, Heisenberg's uncertainty principle, Schrodinger's time-dependent and time independent wave equations, Introduction to quantum computing (bits & qubits, difference between classical and quantum computers).	8
Unit 5	Nano Technology Nano-materials: Nanomaterial, Production techniques (Top down and bottom up), Carbon, Nano Tubes (CNTs), Ball milling and spay pyrolysis methods for synthesis of nanoparticles.	7
Text Books:		
1)	Engineering Physics - R.K. Gaur and S. L. Gupta. DhanpatRai Publications Pvt. Ltd.- New Delhi.	
2)	Fundamental of Physics - Halliday and Resnik. Willey Eastern Limited.	
3)	Applied Physics I: R. J. Gawade, G. M. Kharmate, Dr. A. Chakrabarti, Synergy Knowledgeware Publication.	
Reference Books:		
1)	Engineering Physics – M.N. Avadhanulu and P.G. Kshirsagar, S. Chand and Company Ltd.	
2)	Nanotechnology: An Introduction To Synthesis, Properties And Applications of Nanomaterials – Thomas Varghese, K. M. Balakrishna	
3)	Optics –AjoyGhatak. MacGraw Hill Education (India) Pvt. Ltd	
4)	"Concepts of Modern Physics" by Arthur Beiser	
5)	"Introduction to Quantum Mechanics" by David J. Griffith

	No. of Hrs./week	No. of Credits		
Lectures:	-	-	MSE:	-
Tutorials:	-	-	ICA:	25 Marks
Practical:	2	1	ESE:	-
Total:	2	1	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to

CO 1	Determine the velocity of ultrasonic waves in liquids and the thickness of a thin wire by using wedge shaped thin film.	
CO 2	Determine the radius of curvature of a plano-convex lens by analyzing the fringe pattern formed by Newton's rings.	
CO 3	Measure the specific rotation of optically active substances using a half-shade polarimeter and understand the principles of optical activity and study the crystal Plane	
CO 4	Calculate the wavelength of a laser source using diffraction principles	
CO 5	Demonstrate the synthesis, characterization, and analysis of nanomaterials	

Ex.	Experiment Details	No. of Ex. Sessions (hrs.)
Ex. 1	Determination of velocity of ultrasonic wave in given liquid using ultrasonic interferometer	2
Ex. 2	Measurement of absorption coefficient of given sound absorbing materials	2
Ex. 3	Determination of wavelength of monochromatic light by using Newton's rings	2
Ex. 4	Measurement of radius of curvature of Plano convex lens by using Newton's rings	2
Ex. 5	Determination of wavelength of He-Ne laser using diffraction grating	2
Ex. 6	Determination of the thickness of a thin film by measurement by wedge shaped air film	2
Ex. 7	Determination of the resolving power of a plane diffraction grating using a spectrometer.	2
Ex. 8	Determination of specific rotation of optically active material	2
Ex. 9	Demonstrate the scales of nanotechnology	2

Lectures:	3	3	MSE:	30 Marks
Tutorials:	1	1	ICA:	10 Marks
Practical:	-	-	ESE:	60 Marks
Total:	4	4	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to

CO 1	Illustrate the applications of De Moivre's theorem, and establish relationships between circular and hyperbolic functions.
CO 2	Demonstrate the concept of partial derivatives and their applications in engineering.
CO 3	Compute Jacobians, errors, approximations, and maxima and minima of functions using partial derivatives.
CO 4	Solve first-order differential equations with applications to various engineering problems.
CO 5	Apply vector differentiation techniques to analyze the physical and geometrical properties of vectors.

Unit	Course Contents	No. of lectures (hrs.)
Unit 1	Complex Numbers, Review of complex numbers, De Moivre's theorem, applications of De Moivre's theorem : roots of complex numbers, circular functions of a complex variable and hyperbolic functions, relation between circular and hyperbolic functions, separation of real and imaginary parts, logarithm of complex numbers.	8
Unit 2	Partial Differentiation Partial derivatives of first and higher orders, variable to be treated as constant, total derivative, change of variables, partial differentiation of composite functions, Homogeneous functions – Euler's theorem and their deductions for functions containing two variables (without proof), applications to various engineering problems.	7
Unit 3	Applications of Partial Differentiation Jacobians, properties of Jacobian: $JJ'=1$, errors and approximations, maxima and minima of functions of two variables, Lagrange's method of undetermined multipliers with a single	7

	constraint.	
Unit 4	Ordinary Differential Equations and Their Applications Order and degree of ordinary differential equations, ordinary differential equations of first order and first degree: Exact differential equations and Equations reducible to exact differential equations, linear differential equations, reducible to linear differential equations, Applications to orthogonal trajectories, Newton's law of cooling, Electrical and Electronics engineering applications.	9
Unit 5	Vector Differentiation Velocity vector, acceleration vector, tangential and normal component of acceleration, vector differential operator, gradient, directional derivatives, angle between surfaces, divergence and curl, solenoidal and irrotational field.	8
Text Books:		
1)	Higher Engineering Mathematics (42 nd Edition), B. S. Grewal, Khanna Publications, Delhi.	
2)	Advanced Engineering Mathematics, E. Kreyzig's, John Wiley & Sons, INC.	
Reference Books:		
1)	Higher Engineering Mathematics by B. V. Ramana, Tata McGraw-Hill Publications, New Delhi	
2)	A Text Book of Engineering Mathematics by Peter O' Neil, Thomson Asia Pte Ltd., Singapore.	
3)	Advanced Engineering Mathematics by C. R. Wylie & L. C. Barrett, Tata McGraw- Hill Publishing Company Ltd., New Delhi.	
4)	Engineering Mathematics, Srimanta Pal and Subodh C. Bhunia, Oxford University Press India.	
5)	Mathematics for Engineering Applications, Kuldeep S. Rattan and Naathan W. Klingbeil Wiley.	
6)	Engineering Mathematics Through Applications, Kuldeep Singh, PalgraveMacmilan.	
7)	Advanced Engineering Mathematics, H. K. Dass, S. Chand Publications, Delhi.	
8)	A Textbook of Engineering Mathematics, N. P. Bali and Manish Goyal, Laxmi Publications, 2008	
9)	A Textbook of Applied Mathematics, P. N. and J. N. Wartikar, Vol.1, Pune VidyarthiGrihaPrakashan.	
10)	A Course in Engineering Mathematics (Vol I) by Dr. B. B. Singh, Synergy Knowledgeaware, Mumbai.	
Sr. No.	Name of Tutorial / Assignment	
1)	Solve numericals to find roots of algebraic equations.	
2)	Solve numericals to find logarithms of complex numbers.	
3)	Solve numericals on partial differentiation of composite functions.	
4)	Solve numericals on Euler's theorem on homogeneous functions.	
5)	Solve numericals on errors and approximations.	
6)	Solve numericals to find maxima and minima of functions of two variables.	
7)	Solve numericals of reducible exact and reducible to linear differential equations	
8)	Solve numerical problems of orthogonal trajectories and Newton's law of cooling.	
9)	Solve numerical problems of electrical and electronics engineering applications.	
10)	Solve numericals to find directional derivatives of vectors	
11)	Solve numericals to check whether a given function is irrotational or not, if irrotational then find its scalar potential.

Total:	2	2	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to

CO 1	Identify and use engineering drawing instruments, apply BIS standards for lines, dimensions, and prepare 2D drawings using CAD software.	
CO 2	Interpret and draw projections of points and straight lines in various orientations, and determine their true length and inclinations	
CO 3	Construct projections of different types of planes in various positions with respect to reference planes.	
CO 4	Draw projections of regular solids in different orientations with respect to HP and VP.	
CO 5	Apply principles of orthographic and isometric projection to convert between orthographic and isometric views of objects and machine components manually, and use CAD software.	

Unit	Course Contents	No. of lectures (hrs.)
Unit 1	Fundamentals of Engineering Drawing and CAD Drawing instruments and their uses. Drawing sheet layout, title block, borders, and lettering. Types of lines and dimensioning systems (BIS standards), Introduction to engineering curves, Introduction to CAD: user interface and workspace setup. Basic CAD commands: Draw, Modify, Dimension, and Properties.	6
Unit 2	Projection of Points and Lines Projection of points located in various quadrants. Projection of straight lines: Parallel to HP/VP or both. Perpendicular to HP/VP or both. Inclined to one or both planes. True length and inclination of a line.	5
Unit 3	Projection of Planes Types of planes: triangle, square, rectangle, Pentagon, hexagon, circle, etc. Projection of	5

First Year B. Tech.

Semester-I (w.e.f. A.Y. 2025-26)

Basic Civil Engineering (25UCE11001)

Teaching Scheme:

Evaluation Scheme:

	No. of Hrs./week	No. of Credits		
Lectures:	-	-	MSE:	-
Tutorials:	-	-	ICA:	25 Marks
Practical:	2	1	ESE:	-
Total:	2	1	OE/POE:	25 Marks

Course Outcomes: At the end of this course, students shall be able to

CO 1	Determine the fundamental properties of building material.	
CO 2	Apply fundamental concepts of building components and green building principles in the planning and construction of sustainable structures.	
CO 3	Demonstrate the use of basic surveying, leveling, and geospatial technologies in data collection and mapping tasks.	
CO 4	Illustrate basic principles of transportation engineering to analyze the road components and traffic-related elements in road design.	
CO 5	Examine the principles of water resource management through the identification of water sources, dam and canal types, and irrigation methods.	

Unit	Course Contents	No. of lectures (hrs.)
Unit 1	Introduction to Civil Engineering Definition and various sub-domains of civil engineering. Relevance of the Civil Engineering branch with other branches, Role of the civil engineer in various construction activities, Building Materials & their Properties:- Earth, Bricks, Timber, Stone, Sand, Aggregate, Cement, Mortar, Concrete, Steel, Bitumen.	5
Unit 2	Components of Buildings and Green Building General Idea, Components of Substructure, Foundation, Types of Foundation, Function of Foundation, Superstructure: principle of load transfer, frame action. General idea about substructure, superstructure, and their various elements and their functions, Green Building: concept of planning and construction of green building, sustainable development, Rainwater Harvesting.	6

Unit 3	Surveying Definition, general principles of surveying, classification of surveying, Measurement of Distance and Angle, Introduction to leveling, Types of Leveling, Application of Leveling, Introduction to Geographic Information System (GIS), Global Positioning System (GPS), Remote sensing with applications.	5
Unit 4	Transportation Engineering Introduction, Modes of Transportation, Road Development Plan, Elements of Road Structure, Classification of Roads, Road Drainage, Properties of sub-grade and pavement component materials, Soil Subgrade, Aggregates and bituminous materials, Traffic Study.	5
Unit 5	Water Management Introduction, Sources of Water, Surface Sources of Water, Underground Sources of Water, Introduction to Dams, Selection of Dams Sites, Types of Dams and Selection of Type of Dams, Canals and Types of Canal, Introduction to Irrigation, Types of Irrigation System, Methods of Irrigation.	5

Text Books:

- 1) Elements of Civil Engineering, S.S.Bhavikatti, New Age International Publishers
- 2) Basics of Remote Sensing & GIS, S. Kumar, University Sc. Press

Reference Books:

- 1) Building Construction and Drawing, Bindraand Arora, Dhanpat Rai Publications
- 2) Essentials of Civil Engineering, Rangwala, S.C., Charotar Publishing House
- 3) Building Construction, Volumes 1 to 4, Mckay W.B. and Mckay J.K., Pearson India
- 4) Basic Civil Engineering, L. G. Gole, Mahalaxmi Publications
- 5) Elements of Civil Engineering, Kandya A. A, Charotar Publishing house

Teaching Scheme:		Evaluation Scheme:	
	No. of Hrs./week	No. of Credits	
Lectures:	-	-	MSE:
Tutorials:	-	-	ICA:
Practical:	2	1	ESE:
Total:	2	1	OE/POE:

Course Outcomes: At the end of this course, students shall be able to	
CO 1	Perform standard laboratory tests to determine the properties of common construction materials such as sand, cement, and aggregates.
CO 2	Execute basic field surveying and levelling operations to measure distances, elevations, and prepare plots or building layouts.
CO 3	Interpret and apply municipal building bye-laws, road cross-section drawings, and traffic control symbols used in civil engineering projects.

Ex.	Experiment Details	No. of Ex. Sessions (hrs.)
Ex. 1	Determine the Specific Gravity of Sand.	2
Ex. 2	Determine the fineness of cement by sieving.	2
Ex. 3	Collection of rules and regulations (Building Bye-laws) of any one municipal council/corporation and its study.	2
Ex. 4	To measure the distance between stations by 20m & 30 m Chain & taking the sample offset.	2
Ex. 5	Plotting Outline of Building by Chaining, Ranging and Offsetting.	2
Ex. 6	Calculate simple leveling and differential leveling.	2
Ex. 7	Draw the Sketches showing Standard Cross Sections of NH/SH/MDR/ODR in Embankment or Cutting.	2
Ex. 8	Draw and Identify the Traffic Signs, Road Marking.	2
Ex. 9	Determine the crushing strength test of aggregate.	
Ex. 10	Determine the impact test of the aggregate.	
Ex. 11	Determine the Elongation Index of the aggregate.

First Year B. Tech.

Semester-I (w.e.f. A.Y. 2025-26)

Basic Electrical & Electronics Engineering (25UET11001)

Teaching Scheme:			Evaluation Scheme:	
	No. of Hrs./week	No. of Credits		
Lectures:	2	2	MSE:	30
Tutorials:	-	-	ICA:	10
Practical:	-	-	ESE:	60
Total:	2	2	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to

CO 1	Apply the fundamental laws and theorems of electrical circuits to analyze simple DC and AC circuits.
CO 2	Interpret the construction and working of different electrical systems.
CO 3	Describe the fundamentals of magnetic circuits and single-phase transformers.
CO 4	Explain the working principles and applications of semiconductor diodes.
CO 5	Use types of transistors in electronics circuits.

Unit	Course Contents	No. of lectures (hrs.)
Unit 1	Basics of Electrical Circuits: DC circuits: Electrical elements: Resistor, Inductor, Capacitor, conductor, Ohm's Law, Kirchhoff's Laws (Simple Problems), Star-delta transformation, AC circuits: AC fundamentals: waveforms, RMS value, average values, form factor, peak factor, steady state analysis of R-L-C series A.C. circuits, active, reactive, apparent power, power triangle and power factor, Simple examples.	6
Unit 2	Electrical Machines: Difference between Generator & motors, DC Generators: Working principle, types, DC Motors: Working principle, types, characteristics, Back emf and Torque Equation, Introduction of Induction Machines, Construction and working principle of three-phase induction motor.	5
Unit 3	Electromagnetism and Single-Phase Transformer	5

First Year B. Tech.

Semester-I (w.e.f. A.Y. 2025-26)

Workshop (25UGS11101)

Teaching Scheme:			Evaluation Scheme:	
	No. of Hrs./week	No. of Credits		
Lectures:	-	-	MSE:	-
Tutorials:	-	-	ICA:	50 Marks
Practical:	4	2	ESE:	-
Total:	4	2	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to

CO 1	Acquire knowledge of instruments, machines, and safety precautions.
CO 2	Perform basic carpentry operations to make wooden components
CO 3	Apply different metal forming techniques to shape and form a simple sheet metal job.
CO 4	Execute precision fitting operations using various fitting tools and develop skills in plumbing assembly to create basic piping structures.
CO 5	Understand different machining operations and welding processes.

Ex.	Experiment Details	No. of Ex. Sessions (hrs.)
Ex. 1	Study of various instruments, machines, and safety measures used in the workshop practices.	2
Ex. 2	Making a Carpentry job involving operations such as marking, cutting, sawing, filing, grooving, to make a half lap joint, butt joint, box, miter, mortise & tenon joint, or any other wood article using a suitable wood material. [one job per student]	2
Ex. 3	One job on shaping and forming by using the smithy forging process. [one job per student]	2
Ex. 4	Study of various tools & fitting operations to complete a small product in a fitting shop.	2
Ex. 5	Making a fitting job involving operations such as cutting, sawing, filing, drilling, and tapping using a mild steel (M.S.) plate. [one job per student]	2
Ex. 6	Making a basic plumbing joint assembly using PVC pipe standard fittings like elbow, tee, cross, adapter, etc. [one job per student]	2
Ex. 7	Study of various tools & sheet metal operations.	2

Ex. 8	Making a sheet metal job like tray, box, funnel, pan, or any other sheet metal articles using G.I. sheet, including development, marking, cutting, bending, riveting, soldering/brazing, spot welding, etc.	2
Ex. 9	Study of the gas welding process.	2
Ex. 10	Making a welded joint using a welding machine (Electric Arc welding, TIG, MIG welding, etc.) [one job per student]	2
Ex. 11	Exercise in the soldering process by using a soldering gun for electrical & electronics components. [one job per student]	2
Ex. 12	Demonstration of Lathe operations like plain turning, step turning, taper, turning, threading, grooving, boring, knurling, etc., using a centre lathe machine.	2
Ex. 13	Demonstration of Assembly and Disassembly of I.C. Engines (Two/Four stroke Engines)	2
Text Books:		
1)	Elements of Workshop Technology, Vol – I by Hajara Chaudhari, Media Promoters.	
2)	Workshop Technology Vol-I by Raghuvanchi B. S, Dhanpat Rai & Sons

Lectures:	1	1	MSE:	-
Tutorials:	-	-	ICA:	25 Marks
Practical:	-	-	ESE:	-
Total:	1	1	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to

CO 1	Use correct grammar, vocabulary, articles, and tenses in speaking and writing.
CO 2	Explain the communication process, types, barriers of communication and ways to overcome them.
CO 3	Apply interview skills, group discussion techniques, and teamwork for career success.
CO 4	Show communication through effective listening, speaking, reading, and writing.
CO 5	Developing professional business letters, resumes, and emails clearly and correctly.

Unit	Course Contents	No. of lectures (hrs.)
Unit 1	Grammar and Vocabulary for Communication Articles, Parts of Speech, Tenses, Vocabulary- Prefix, Suffix, Antonyms, and Synonyms.	3
Unit 2	Fundamentals of Communication Definition, Meaning & Importance of Communication, Process of Communication, Types of Communication: Verbal, Non-verbal, Written, Visual, Barriers to Effective Communication & Ways to Overcome.	3
Unit 3	Professional Communication and Career Skills Interview Techniques: Preparation, FAQs, Do's and Don'ts, Group Discussions: Do's and Don'ts, Participation, Evaluation, Time Management, and Teamwork in Communication.	3
Unit 4	Oral Communication & Presentation Skills Effective Use of L, S, R, W, Listening Skills: Types and Barriers, Public Speaking.	2

Teaching Scheme:			Evaluation Scheme:	
	No. of Hrs./week	No. of Credits		
Lectures:	2	2	MSE:	30 Marks
Tutorials:	-	-	ICA:	10 Marks
Practical:	-	-	ESE:	60 Marks
Total:	2	2	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to	
CO 1	Describe chemical analysis methods and perform solution preparation, titration, and analytical techniques.
CO 2	Describe water chemistry concepts and identify the water treatment process for engineering applications.
CO 3	Explain fuels and lubricants and classify them based on their properties as suitable energy sources and engineering materials.
CO 4	Discuss corrosion concepts and common methods for prevention.
CO 5	Summarize knowledge of cement, polymers, and rubber for engineering use.

Unit	Course Contents	No. of lectures (hrs.)
Unit 1	Introduction to Analytical Chemistry Chemical Analysis: Importance in engineering and science, Types: Qualitative and Quantitative analysis, Electroanalytical Methods: Introduction and need for electrochemical analysis, pH-metric and conductometric titration -Electrode systems and instrumentation basics. Construction & function of glass and conductivity electrodes.	5
Unit 2	Water Treatment Introduction, Water Standards: Industrial and domestic water quality as per BIS guidelines. Water Hardness: Definition, units (ppm, mg/L), types – Temporary and Permanent hardness, Causes and Impacts – scaling in boilers and pipelines, desirable parameters for drinking water, domestic water, and industrial use, Water Softening Techniques: lime-soda process and Zeolite methods. Flow chart and function of water treatment process for drinking water: Aeration and Disinfection. Numerical problems based on the hardness of water.	6

Course Outcomes: At the end of this course, students shall be able to

CO 1	Determine water quality analysis and key parameters for environmental monitoring.	
CO 2	Calculate physical properties of lubricants to evaluate their suitability in engineering applications.	
CO 3	Examine oils and assess deterioration levels through chemical characterization tests.	
CO 4	Use electrochemical and instrumental methods to identify the equivalence point in titrations.	
CO 5	Apply analytical and thermal techniques to separate components and estimate the energy content of fuels.	

Ex.	Experiment Details	No. of Ex. Sessions (hrs.)
Ex. 1	Determination of Dissolved Oxygen in water by Iodometric method.	2
Ex. 2	Determination of water holding capacity of Soil.	2
Ex. 3	Determination of viscosity of lubricant oil using Ostwald's viscometer.	2
Ex. 4	Estimation of rate of corrosion of the given aluminum piece.	2
Ex. 5	Determination of surface tension of lubricants by the stalagmometer.	2
Ex. 6	Determination of the acid value of an oil.	2
Ex. 7	Determination of Calcium Oxide (CaO) Percentage in Cement Sample	2
Ex. 8	Determination of the equivalent point in acid-based titration using a pH meter.	2
Ex. 9	Separation and identification of cations by paper chromatography.	2
Ex. 10	Determination of equivalence point by Acid-Base Conductometric Titration.	2

	(An Autonomous Institute)			
	First Year B. Tech.			
Semester-II (w.e.f. A.Y. 2025-26)				
Engineering Mathematics-II (25UGS12007)				

Teaching Scheme:			Evaluation Scheme:	
	No. of Hrs./week	No. of Credits		
Lectures:	3	3	MSE:	30 Marks
Tutorials:	1	1	ICA:	10 Marks
Practical:	-	-	ESE:	60 Marks
Total:	4	4	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to		
CO 1	Use matrix algebra to solve systems of linear equations in engineering problems.	
CO 2	Apply matrix methods to find eigenvalues and eigenvectors, and use the Cayley-Hamilton theorem with applications.	
CO 3	Demonstrate curve tracing in various coordinate systems.	
CO 4	Apply multiple integrals to determine the area and mass of a lamina.	
CO 5	Apply statistical tools like correlation, regression, and curve fitting for effective engineering data analysis.	

Unit	Course Contents	No. of lectures (hrs.)
Unit 1	Matrices Rank of a matrix, normal form of a matrix, consistency of systems of linear equations, system of homogeneous equations and non – homogeneous equations, linear dependence and independence of vectors, applications to diverse engineering problems: Electrical and Electronics engineering applications, balancing the chemical reactions.	8
Unit 2	Eigen Values and Eigen Vectors Eigen values, eigen vectors, properties of eigen values and eigen vectors, Cayley-Hamilton Theorem (without Proof), applications of Cayley-Hamilton theorem, applications to various engineering problems: stability in control systems.	8
Unit 3	Tracing of Curves. Definition and significance of curve tracing, Classification of curves: Cartesian, polar, parametric, etc., tracing of Cartesian curves, tracing of parametric curves, tracing of polar curves: cardioid and rose curve only.	8

Chairman

Unit 4	Multiple Integration Double integration, evaluation over the given region, change of order of integration, change to polar coordinates, triple integration, application of double integral to compute area, mass of lamina.	8
Unit 5	Statistics Correlation: Karl Pearson's coefficient of correlation, regression, fitting of curve: fitting of straight line, parabola, and related curves, applications to various engineering problems.	7
Text Books:		
1)	Higher Engineering Mathematics (42nd Edition), B. S. Grewal, Khanna Publications, Delhi.	
2)	Advanced Engineering Mathematics, E. Kreyzig's, John Wiley & Sons, INC.	
Reference Books:		
1)	Higher Engineering Mathematics by B. V. Ramana, Tata McGraw-Hill Publications, New Delhi	
2)	A Text Book of Engineering Mathematics by Peter O'Neil, Thomson Asia Pte Ltd., Singapore.	
3)	Advanced Engineering Mathematics by C. R. Wylie & L. C. Barrett, Tata McGraw- Hill Publishing Company Ltd., New Delhi.	
4)	Engineering Mathematics, Srimanta Pal and Subodh C. Bhunia, Oxford University Press India.	
5)	Mathematics for Engineering Applications, Kuldip S. Rattan and Naathan W. Klingbeil, Wiley. (Modeling and Core Engineering Application).	
6)	Engineering Mathematics Through Applications, Kuldeep Singh, PalgraveMacmilan.	
7)	Fundamentals of Statistics, S. C. Gupta, Himalaya House Publication.	
8)	Advanced Engineering Mathematics, H. K. Dass, S. Chand Publications, Delhi.	
9)	A Textbook of Applied Mathematics, P. N. and J. N. Wartikar, Vol.1, Pune VidyarthiGrihaPrakashan.	
10)	A Course in Engineering Mathematics (Vol I) by Dr. B. B. Singh, Synergy Knowledge, Mumbai.	
Sr. No.	Name of Tutorial / Assignment	
1)	Solve numericals on the rank of a matrix using the normal form.	
2)	Solve numericals on a system of simultaneous linear equations by the matrix method.	
3)	Solve numericals to find eigen values and eigen vectors of the matrix.	
4)	Solve numericals on the Cayley-Hamilton theorem.	
5)	Solve numericals on tracing of parametric curves.	
6)	Solve numericals on tracing of polar curves.	
7)	Solve numericals of changing the order of integration.	
8)	Solve numericals to find the area and mass of a lamina by using double integration.	
9)	Solve numericals on correlation and regression.	
10)	Solve numericals on the fitting of curves.

Total:	3	3	OE/POE: -

Course Outcomes: At the end of this course, students shall be able to	
CO1	Determine the resultant force and moment for the given force system.
CO2	Examine the forces in static structures through free body diagrams, equilibrium equations for beams, and framed systems.
CO3	Calculate frictional forces, centroids, and the center of gravity for simple and composite bodies using fundamental engineering principles.
CO4	Solve problems related to linear and projectile motion using principles of kinematics and laws of motion.
CO5	Apply the concepts of kinetics, work–energy and impulse–momentum methods to a particle in motion.

Unit	Course Contents	No. of lectures (hrs.)
Unit1	Introduction to Engineering Mechanics Basic Concepts- Classification of Mechanics, Laws of Mechanics, Systems of Forces: Coplanar Concurrent Forces & Non-concurrent Forces Resultant of Force System, Varignon's Theorem, Laws of Forces & Resultant of Force Systems. Moment of Force and its Application – Couples.	7
Unit2	Equilibrium of Systems of Forces Free Body Diagrams, Equations of Equilibrium of Coplanar Systems, and Spatial Systems for concurrent forces, Lami's Theorem, and Condition of Equilibrium. Types of Loads, Supports & Beams; Analysis of Beam & Framed Structures	7
Unit3	Friction, Centroid & Moment of Inertia Friction: Introduction, limiting friction, and impending motion. Coulomb's laws of dry friction, coefficient of friction, and cone of friction. Centroid- Centroid of simple	8

	figures (from basic principles) – Centroid of composite figures. Centre of Gravity: Centre of gravity of a simple body (from basic principles).	
Unit4	Kinematics of Particle Kinematics of linear motion: types of motion, laws of motion, Kinematics of particles, rectilinear motion, constant and variable acceleration, study of motion diagrams, Motion under gravity, projectile motion, concept of relative velocity.	7
Unit5	Kinetics and Work, Power, Energy Kinetics of particle: D 'Alembert's principle: applications in linear motion, kinetics of rigid bodies, Applications in translation. Work done by a force, potential energy, kinetic energy of linear motion and rotation, work-energy equation, conservation of energy, and power. Collision of elastic bodies, Impulse momentum principle.	7

Lectures:	-	-	MSE:	-
Tutorials:	-	-	ICA:	25 Marks
Practical:	2	1	ESE:	-
Total:	2	1	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to	
CO1	Calculate the resultant force for the given force system.
CO2	Determine the centroid or moment of inertia of the given structural elements of a specific shape and size.
CO3	Calculate force & moment to solve the given force system.
CO4	Determine unknown forces or moments using the equilibrium condition
CO5	Apply the laws of friction in the given situation.

Ex.	Experiment Details	No. of Ex. Sessions (hrs.)
1	Verify the law of polygon of forces using the Universal force table for given forces.	2
2	Determine the Resultant of concurrent coplanar forces using the graphical method.	2
3	Verify the centroid of a plane figure of given dimensions by making a simple paper model.	2
4	Determine the Moment of Inertia of a Fly Wheel	2
5	Determine the support reactions of a simply supported beam using the parallel force or beam reaction apparatus for given vertical forces.	2
6	Determine the support reactions of a simply supported beam using the graphical method	2
7	Verify the law of moment of forces using the law of moment apparatus for the given forces. (by Bell Crank Lever)	2
8	Verify Lami's theorem using the Universal force table apparatus for the given forces.	2

Lectures:	2	2	MSE:	30 Marks
Tutorials:	-	-	ICA:	10 Marks
Practical:	-	-	ESE:	60 Marks
Total:	2	2	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to		
CO 1	Explain the basic domains of mechanical engineering and the working of simple machine tools	
CO 2	Describe power plants and IC engines with their basic components and working..	
CO 3	Apply basic design, aesthetics, and ergonomic principles to simple products	
CO 4	Explain basic thermodynamic concepts and laws.	
CO 5	Demonstrate working principles of pumps, compressors, and turbines.	

Unit	Course Contents	No. of lectures (hrs.)
Unit 1	Introduction to Mechanical Engineering Role of Mechanical Engineering in Industries and Society, sub-domains of mechanical engineering: Thermodynamics, fluid mechanics, manufacturing engineering, robotics and automation, aerospace engineering, automotive engineering, mechatronics, Machine tools: Centre Lathe - Basic elements, working, Operations on lathe - Turning, Facing. Drilling Machine - Basic elements of the drilling machine, applications.	5
Unit 2	Power Plants and IC engines. Power Plants: Thermal Power Plant, Hydroelectric Power Plant, Nuclear Power Plant, Elements, Advantages, Limitations, IC engines- definition, classification, components of IC engines, 2-Stroke and 4-Stroke engines.	5
Unit 3	Engineering Design, Aesthetic & Ergonomics Engineering Design: Need of Design, Design considerations, steps in design,	5

Tutorials:			ICA:	50 Marks
Practical:	4	2	ESE:	-
Total:	4	2	OE/POE:	

Course Outcomes: At the end of this course, students shall be able to		
CO 1	Demonstrate a clear understanding of basic computer concepts and effectively operate operating system environments (Windows/Linux) for daily office tasks.	
CO 2	Illustrate word format, and manage professional documents using word processing tools like MS Word or Google Docs, including mail merge and print setup.	
CO 3	Use spreadsheet software to organize, analyze, and present data using formulas, functions, charts, and formatting techniques.	
CO 4	Design engaging presentations and communicate effectively using email, internet tools, and virtual meeting platforms.	
CO 5	Operate common office equipment, manage digital files securely, use cloud storage, and apply basic cybersecurity practices to protect data.	

Ex.	Experiment Details	No. of Ex. Sessions (hrs.)
Ex. 1	Create a formatted document with headings, bullet lists, page setup, header/footer, and page numbers.	2
Ex. 2	Perform a Mail Merge to generate multiple invitation letters or certificates using a contact list.	2
Ex. 3	Insert tables, images, symbols, and use spelling/grammar tools in a professional document.	2
Ex. 4	Enter data in a spreadsheet and apply basic formatting and functions like SUM, AVERAGE, and IF.	2

Ex. 5	Create charts (bar, pie, line) from data and apply sorting, filtering, and conditional formatting.	2
Ex. 6	Demonstrate use of cell referencing (relative/absolute), data validation, and password protection in sheets.	2
Ex. 7	Design a PowerPoint presentation with text, images, transitions, animations, and audio/video using the Canva tool.	2
Ex. 8	Use Gmail to compose and send an email with CC/BCC, attach files, and organize emails into folders/labels.	2
Ex. 9	Demonstrate use of cloud storage (Google Drive/One Drive) – upload, organize, share, and download files.	2
Ex. 10	Practice basic cybersecurity: set strong passwords, identify phishing emails, and explore antivirus/firewall tools.	2
Ex. 11	Create a virtual meeting for effective communication using Zoom or Google Meet platform.	2
Ex.12	Case Study: How to use AI tools and common software like Word, Excel, PowerPoint, Gmail, and cloud storage to create documents, manage data, design presentations, send emails, and ensure cybersecurity.	2

Note:

1. For the 12th practical, assign a list of case studies based on all 11 previous practicals. Each group of 4 students should select one case study, create a detailed report in a Word file, upload the file to Google Drive, and share the link via email.

(An Autonomous Institute)

First Year B. Tech.

Semester-II (w.e.f. A.Y. 2025-26)

IKS-Vedic Mathematics (25UGS11201)

Teaching Scheme:			Evaluation Scheme:	
	No. of Hrs./week	No. of Credits		
Lectures:	2	2	MSE:	-
Tutorials:	-	-	ICA:	50 Marks
Practical:	-	-	ESE:	-
Total:	2	2	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to

CO 1	Explain the concept of IKS and the overview of Vedic mathematics.
CO 2	Solve problems on vinculum numbers, beejank methods, and straight division using Paravartya and Dhvajank.
CO 3	Demonstrate Dwandvayoga, Vilokanam, and traditional methods for square roots, cube roots, and extended operations.
CO 4	Predict recurring decimal patterns and verify divisibility using osculators like Ekadhikena and Ekanyunena.
CO 5	Determine the advantages of simultaneous operations in mixed arithmetic calculations.

Unit	Course Contents	No. of lectures (hrs.)
Unit 1	Indian Knowledge System and Vedic Mathematics IKS Foundational concepts and characteristics of Indian philosophical and scientific traditions; Significance of Ancient Knowledge, Overview of Indian mathematics, works by Indian Mathematicians, Vedic Mathematics, aims and objectives of vedic mathematics, Sutras and Up-sutras of Vedic Mathematics.	5
Unit 2	Fundamental Operations in Arithmetic Vinculum Numbers and their Applications in Tables, Addition, Multiplication and Division, Multiplication, by Nikhila, Ekadhikena, Ekanyunena & Urdhvatiyagbhyam, Beejank and their Applications in Addition, Subtraction, Multiplication, Square and Division, Straight Division by Nikhila, Paravartya & Dhvajank.	6
Unit 3	Extended Operations Square and Square root by Dwandvayoga, Addition and Difference of Square, Square root	5

	by Vilokanam&Dwandva yoga, Cube and Cube root, MeruPrastar in Higher Powers.	
Unit 4	Osculators Recurring Decimals by Ekadhikena and Ekanyunena, Divisibility Test and Quotient by Ekadhikena and Ekanyunena.	5
Unit 5	Mixed Operations Mixed Operations of Addition, Subtraction Multiplication and Square by Simultaneous Operations.	5
Text Books:		
1)	Introduction to Indian Knowledge System: Concepts and Applications, Mahadevan B., BhatVinayakRajat, NagendraPavana R.N. (2022), PHI Learning Private Ltd. Delhi.	
2)	Vedic Mathematics, S.B. K. Tirthaji, Agrawala (editor), Motilal Banarsidas, New Delhi	
Reference Books:		
1)	Vedic Ganit Nirdeshika Bhag-2, Vidya Bharti Akhil Bhartiya Shiksha Sansthan Kurushetra	
2)	Vedic Ganit Vihangam Drishti 1, Shiksha Sanskriti Uthhan Nyas Delhi	
3)	Lilavati of Bhaskracarya: A Treatise of Mathematics of Vedic Tradition	
4)	History of Science in India Volume-1, Part-I, Part-II, Volume VIII, SibajiRaha, et al. National Academy of Sciences, India and The Ramkrishan Mission Institute of Culture, Kolkata (2014).	
5)	Indian Knowledge Systems Vol – I & II, Kapoor Kapil, Singh Avadhesh (2021), Indian Institute of Advanced Study, Shimla, H. P..	
6)	Mathematics in Ancient and Medieval India, Bag, A. K. (1979). Chaukhamba Orientalia, New Delhi.	
7)	Textbook on The Knowledge System of Bhārata, Bhag Chand Chauhan, Garuda Prakashan.

Teaching Scheme:			Evaluation Scheme:	
	No. of Hrs./week	No. of Credits		
Lectures:	-	-	MSE:	-
Tutorials:	-	-	ICA:	50 Marks
Practical:	4	2	ESE:	-
Total:	4	2	OE/POE:	-

Course Outcomes: At the end of this course, students shall be able to		
CO 1	Demonstrate the forms of yoga.	
CO 2	Demonstrate the practices of pranayama.	
CO 3	Apply the fundamental ideas and methods of physical education.	
CO 4	Apply knowledge of sports for physical and mental wellness.	
CO 5	Illustrate the use of yoga, pranayama, and sports activities to promote physical fitness and mental well-being.	

Ex.	Experiment Details	No. of Ex. Sessions (hrs.)
Ex. 1	Yoga History and philosophy of yoga, different styles of yoga (Hatha, Vinyasa, Ashtanga, Basic yoga postures (asanas) and their benefits, Principles of alignment and balance, Shitalikarna, Vyayama, Suryanamaskara.	12
Ex. 2	Pranayama and Breath Control Pranayama, importance of pranayama, types of pranayama (e.g., Anulom Vilom, Kapalabhati, Bhramari), Benefits of breath control for physical and mental health.	12
Ex. 3	Physical Education Meaning, Definition and Importance of Physical Education, Aim and Objective, Conditioning exercises, warming up and cooling down.	8
Ex. 4	Fundamentals of Sports for Wellness Types of sports and their health benefits, Indoor and outdoor sports. Basic principles of physical fitness and conditioning, developing a personalized fitness plan, safety measures,	12
